

# **PROGRAMA DE PÓS-GRADUAÇÃO EM ECOLOGIA E CONSERVAÇÃO**

**EDITAL 03/2016. SELEÇÃO DE MESTRADO**

**PROVA DE IDIOMA ESTRANGEIRO – INGLÊS**

n° identificação							
------------------	--	--	--	--	--	--	--

**Instruções: Leia atentamente o texto anexo e responda as seguintes perguntas, em português.**

**1)** What can you say about the effects of the climate change in relation to natural populations?

**2)** Which kind of alterations in populations due to the change in climate are not so frequent?

**3)** What are the purposes of using multispecies indicators?

**4)** Why did the authors create this indicator?

**5)** Which evaluation was done for the first time with this approach?

**6)** Cite the first three steps for the creation of the indicator used here.

**7)** Which are the indices used in this work for the two subcontinents?

**8)** How is called the new indicator presented here (also with abbreviation)? What does this indicator show?

**9)** What is the reason why the authors could not confirm that the observed changes are also global?

**10)** Which are the main conclusions of this article concerning the application of the indicator developed by the authors?
